

OCTOBER 2011

BUSINESS ANALYST

As one of the 50 Best Managed Companies, NRT is looking for a dynamic candidate who is motivated and passionate about working for an industry leader in technology!

NRT is the globally recognized industry leader in self-serve redemption and jackpot solutions, and has placed over 4,500 devices in over 300 casino locations throughout Canada, United States, the Caribbean, Europe and Asian gaming markets.

We offer a competitive salary, group benefits (health, vision, dental and life insurances), career advancement opportunities, challenging work, and a convenient work location!

Our environment is entrepreneurial and fast-paced. Individual and creative contributions to our company objectives are highly encouraged and recognized. There will be an abundance of opportunities to develop new skills and to benefit from interaction with a highly experienced leadership team.

Check us out at: www.nrttech.com

Reporting to the Business Support Manager, the **Business Analyst's** primary mandate is to develop and document the business requirements for NRT's suite of products.

Core Competencies

- Software development
- Initiative
- Achievement/Results Oriented
- Teamwork
- Customer service
- Flexibility/Adaptability
- Problem Solving
- Building relationships
- Business acumen

Job duties and responsibilities (include, but are not limited to):

- Works with customers and/or vendors to define the technical requirements for projects
- Works with the software development team to ensure that the software is developed according to business requirements.
- Works closely with the Project Management Office to provide estimates and business requirement documents for final sign off.
- Analyse business and software specifications, and outline the scope of work required to implement it.
- Provide high-level and low-level functional specifications
- Create screens, workflows, and diagrams representing the new requirements.
- Other projects/duties as assigned by the Business Support Manager.

Job Requirements:

- Bachelor Degree
- Strong knowledge of software design processes
- Fluency in English (written and spoken word). Knowledge in other languages is an asset, but not a pre-requisite.
- 5-10+ years experience in a Business Analyst role.
